The P22 Mystic fonts knows all. Aside from allowing for type design in a faux eastern script, this font peers into the world of the spirits for guidance and enlightenment. Sure it has small caps and ligatures as OpenType features, but it also has a special “oracle” feature which will answer your most mystifying questions.

Is one plus two three?\*

NO

\*MYSTIC FONT UNRELIABLE FOR MATH BASED QUESTIONS.

The design was based on an actual Ouija board. Somehow the spirits became embedded into the font itself and now when a question is typed, an answer is revealed (provided the contextual alternates feature is enabled). It is not known how the otherworldly harbinger was able to integrate into OpenType scripting, but who are we mere mortals to question this power?
